The Next-Generation Planning Platform

Deeper Understanding Of Scope And Execution With OwlPM

- ✓ 100% scope coverage
- ✓ Execution strategy locked in automatically
- ✓ Proactive alerts before delays hit
- ✓ Works with P6 · Export anytime
- ✓ Keep your schedule standard compliant

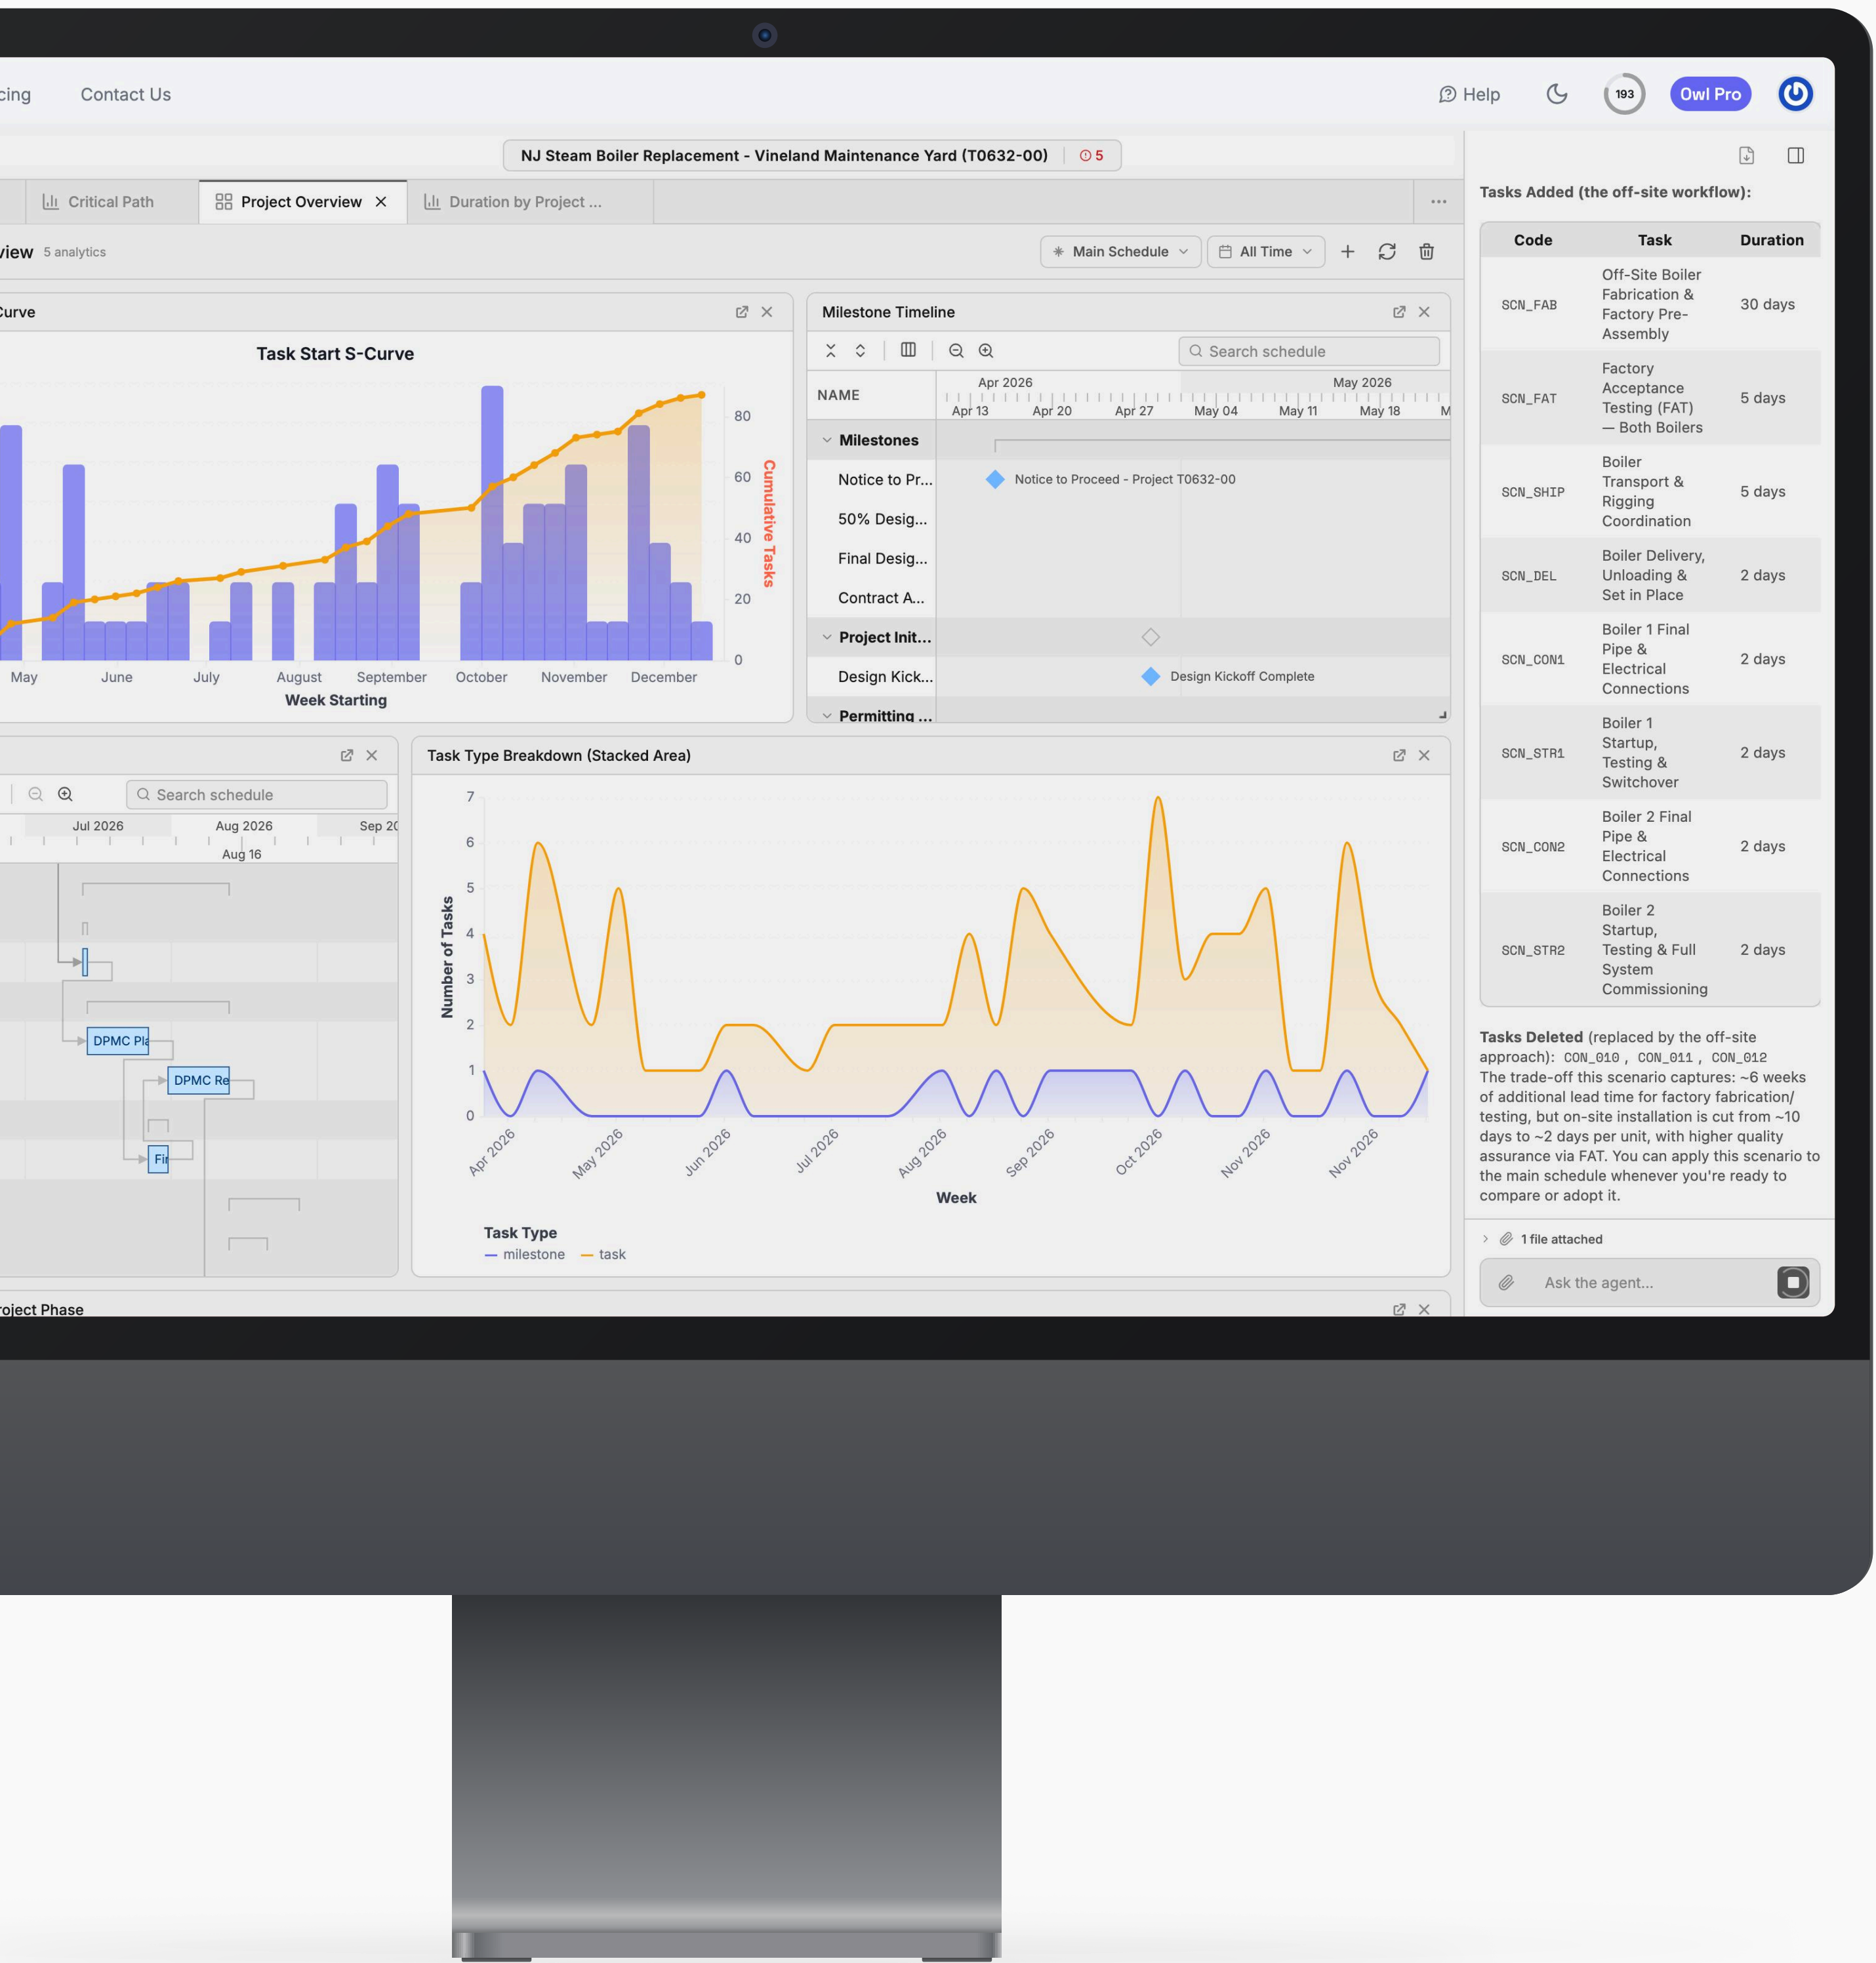

SOUND FAMILIAR?

The quality problems every planner knows too well

Owl was built specifically to eliminate these not work around them.

See it in Action

A Single Platform to Build, Analyze, and De-Risk your Projects

Owl's guardrails and analytics capabilities keep your schedule quality high, even for very complex projects. It surfaces issues immediately before they become real problems.

How Owl works

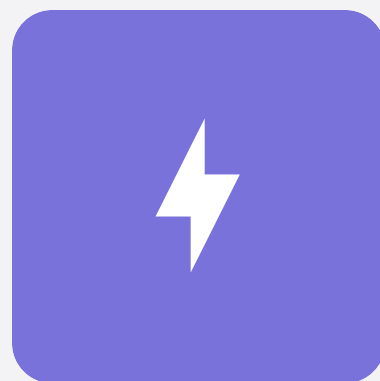

From raw data to a schedule that holds.

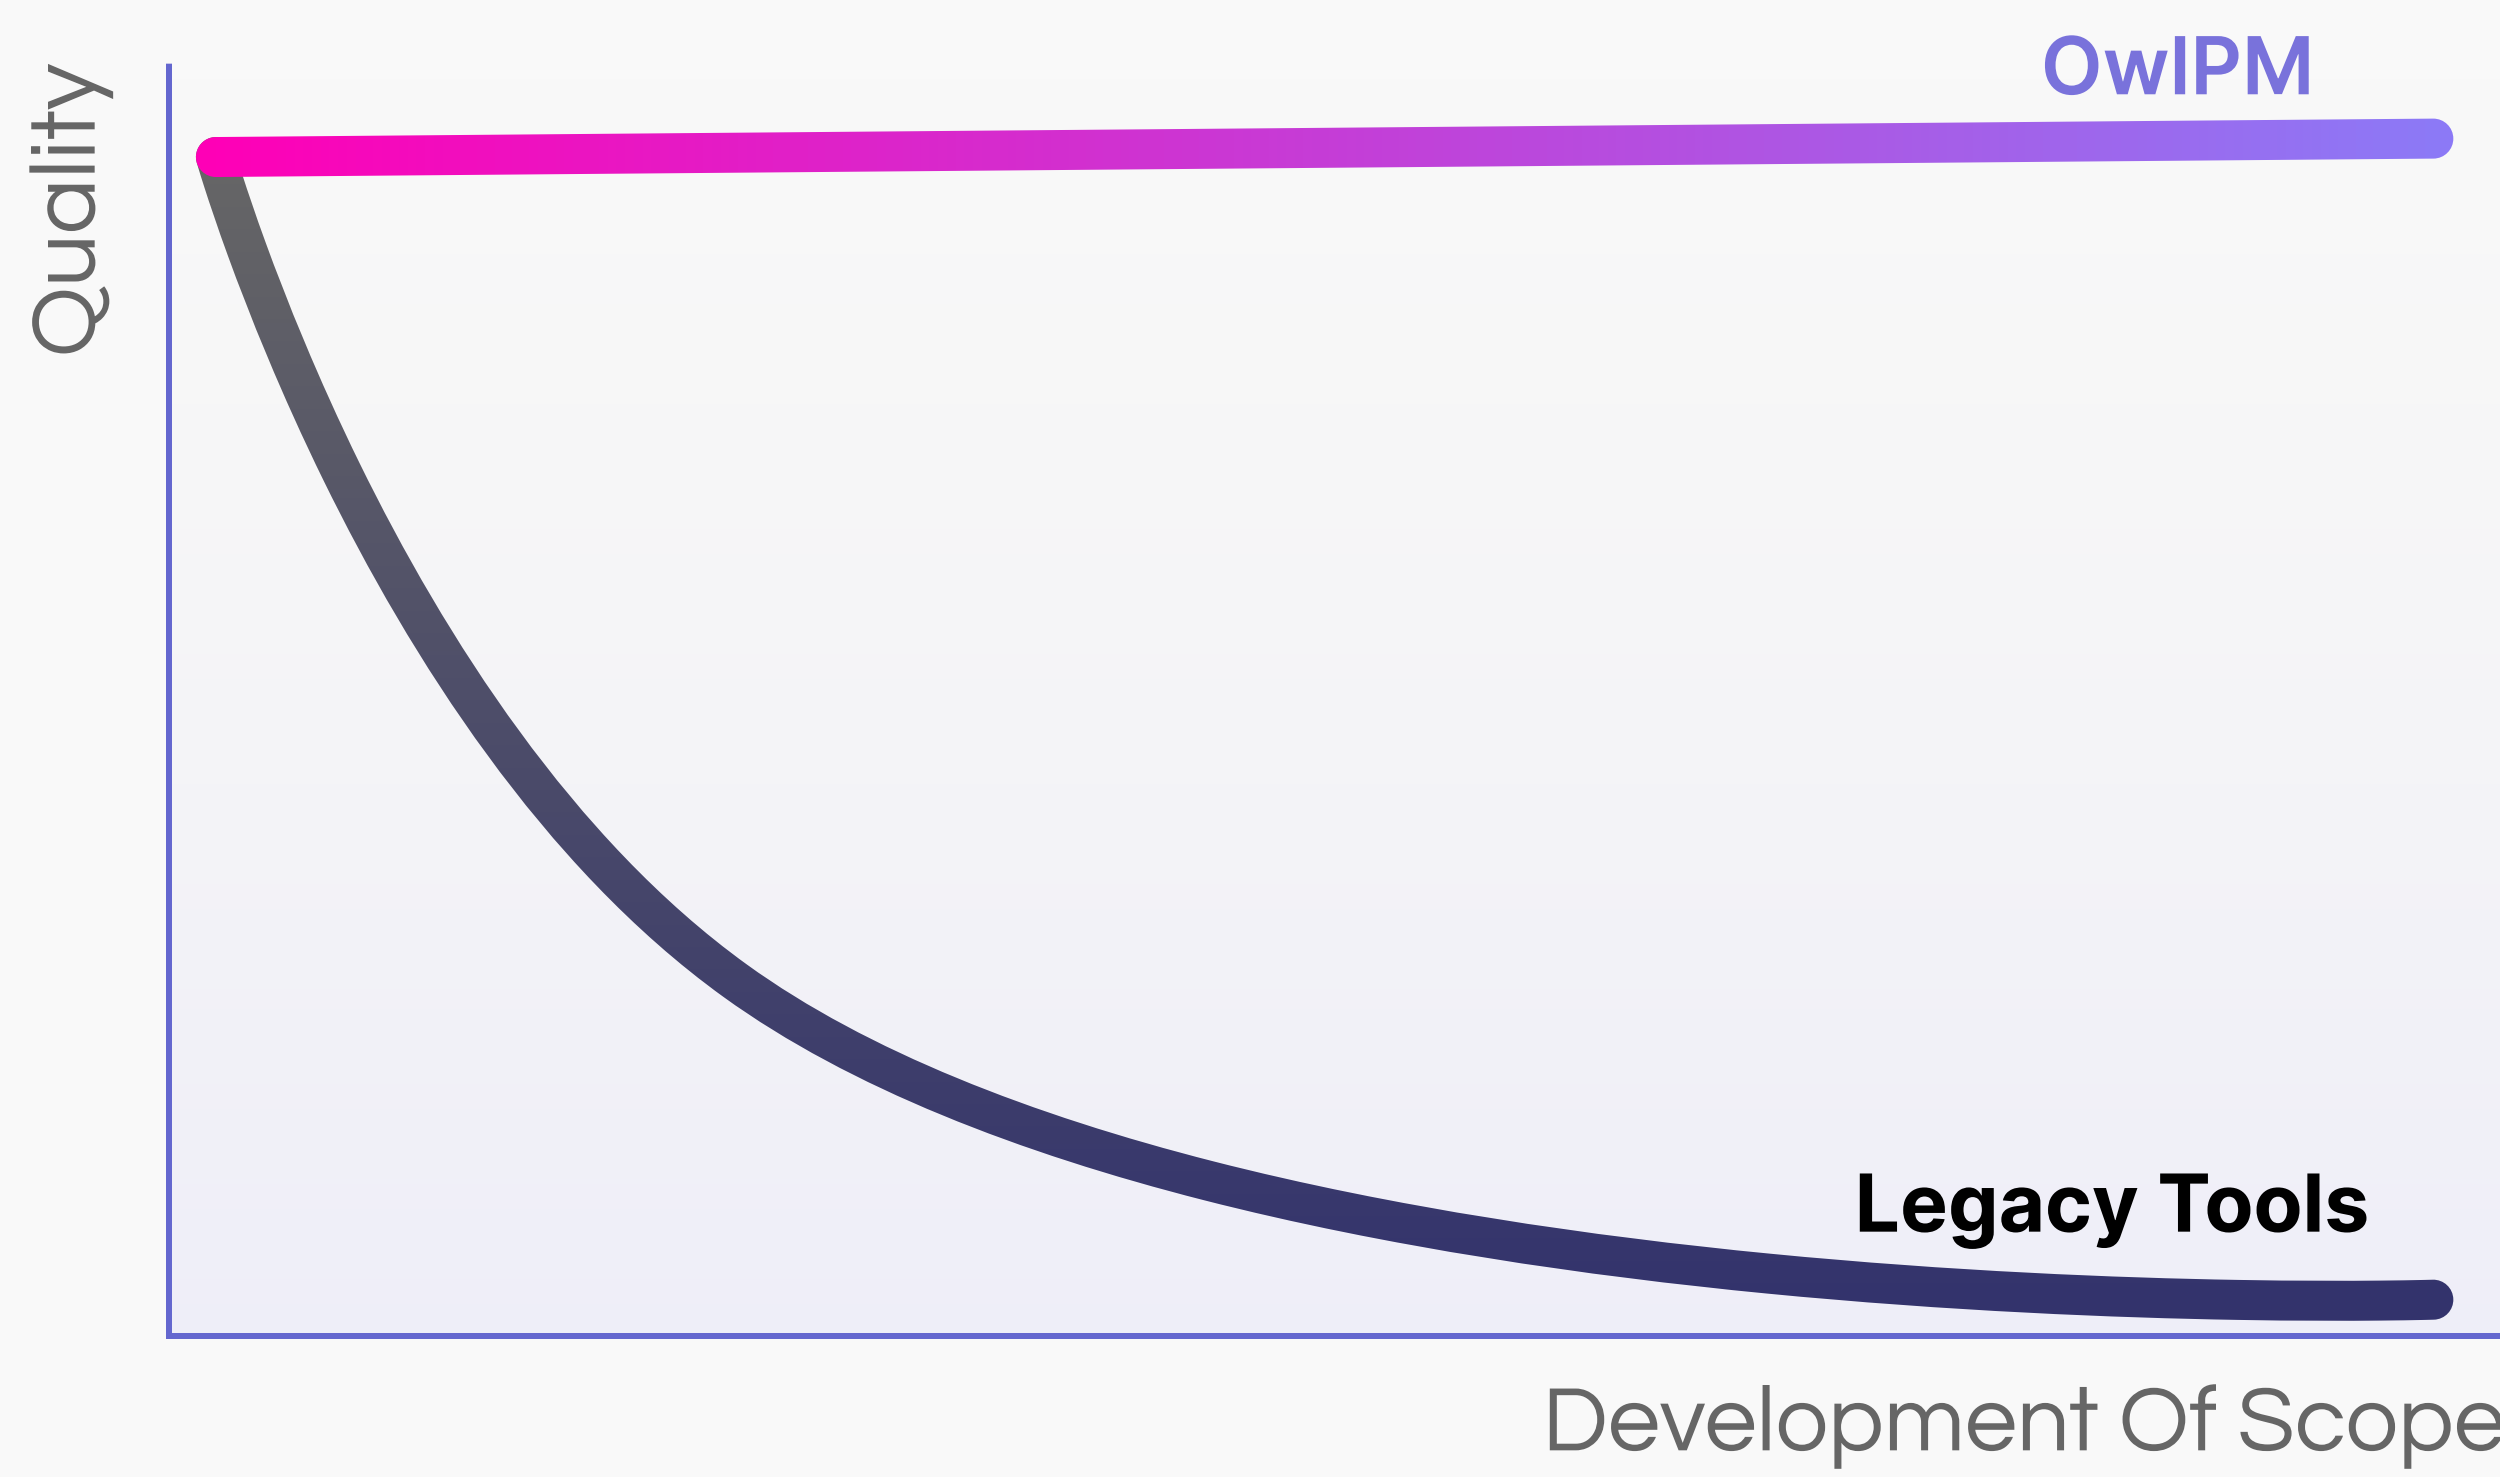

- 1 Feed it your project data**
Specs, drawings, scope docs, P6 files. Owl reads **thousands of pages** and understands every dependency automatically.
- 2 Define your rules once**
Tell Owl your constraints in plain language. Your execution strategy, standards, and compliance requirements get **locked in permanently**.
- 3 Get a complete, compliant schedule**
100% scope covered. DCMA, GAO, ISO, your standards all checked. **What took weeks, done in minutes.**
- 4 Owl keeps watching for you**
Shipment delayed? Document rejected? Bad weather incoming? Owl **flags risks before they hit** your critical path.
- 5 You stay in control**
Review, adjust, export to P6. Owl handles the heavy lifting. **You own every decision.**

OwIPM can replace your scheduling and dashboarding tools or integrate with them, including Primavera P6 and PowerBI.

Owl's Features

Everything Owl does for you

- **Plans that are actually complete**
Every scope item and component is tracked so nothing falls through the cracks mid-execution.
- **Your execution strategy, built in**
Sequencing rules, resource limits, timing constraints are enforced automatically.
- **Weeks of planning work, done in minutes**
Owl digests thousands of pages of specs and drawings without compromising on standards.
- **Automation that amplifies your expertise**
You decide what gets automated and what stays manual, Owl handles compliance checks, delay analysis, and more.

Real-time execution strategy and metrics checks ensure a high-quality, even for massive, complex schedules
